

### Large Butterfly Valves

Protection Of New Valves or Refurbishment of Old

**Industry:** Power  
**Product:** Corroglass 600 Series  
**Expertise:** Internal protection of Valves

Corrocoat can protect and refurbish large butterfly valves. We have extensive knowledge of these large valves and our UK factory can manufacture valves from 1.25M Dia to 3.35M Dia. The addition of Corroglass 600 series when new will help protect these expensive assets and increases their design life considerably.

### Large Gate Valve

To Be Scrapped Due to Corrosion

**Industry:** Oil & Gas  
**Product:** Corroglass 600 series  
**Expertise:** Protection of Valves

The epoxy coating in this valve failed after 12 months in warm seawater and was to be scraped. Corrocoat were able to refurbish the valve using 600 series at a fraction of the cost of a new valve and in the process eliminate the cause of the failure, corrosion. Following this success all new and existing valves on this oil platform were coated with Corroglass 600 series.

### Cost Effective Valve Refurbishment

48" Butterfly Valve Refurbishment

**Industry:** Power  
**Product:** Corroglass 600 Series  
**Expertise:** Rebuild Valves

The valve flap and body had deep pits and metal loss around the sealing edges. As a result the valve had become totally ineffective. The valve was totally refurbished old for new with a 20 year life expectancy. The refurbishment of an existing valve can provide considerable savings over expensive metal castings or new valves with changes to pipework.
